

Injury Policy

This policy explains the Club's position on players returning from injury and should be applied when a player has received advice from a Health Professional about returning from injury and relevant restrictions to participation in fixtures and/or training.

Any player who has sought this advice must produce a clearance letter from the Health Professional stating that they are fit to resume playing or training (including any direction about restricted activities).

If the activity is to be limited on the advice of the Health Professional, the parent/guardian is responsible for overseeing the training and playing and must be at the court at all times, to carry out the advice given to them by the Health Professional.

If a parent/guardian is unable to obtain a clearance letter from the Health Professional for any reason the parent/guardian must supply a letter stating that the player is fit to resume training and playing netball, as per Health Professional instructions. The letter must state that the parent/s will take full responsibility for not getting the clearance letter from the Health Professional and that the chance of further exacerbation of the existing or recovered injury is understood and is their responsibility should this occur.

Our coaches and managers are not medically trained to determine when a player can return to physical activity and to what extent.

If you have any questions about this please see a member of the Brothers Executive.
